Usability Attributes – ISO 25010 SQuaRE

This is the list of usability attributes from ISO 25010 we will be using as the foundation for defining nonfunctional requirements.

[1] Appropriateness Recognizability

How well can you recognize whether a product or system is appropriate for your needs.

[2] Learnability

How easy it is to learn how to use a product or system.

[3] Operability

Attributes that make it easy to operate and control.

[4] User Error Protection

How well does a system protect users against making errors.

[5] User Interface Aesthetics

Refers to whether a user interface is pleasing.

[6] Accessibility

How well can a product or system be used with the widest range of characteristics and capabilities.

Nonfunctional requirements

- 1 The system must have a consistent style between courses - [2] [5] [6]
 - 1.1 The interface will be built using the elements from a design system
 - 1.2 All course content layouts must follow a standardized template
- 2 The system must protect users from common errors - [3][4] [6]
 - 2.1 Confirmation dialogs must be displayed before irreversible actions (e.g., withdrawing from a course, account deletion)
 - 2.2 If a user answers a question incorrectly a message should be displayed stating clearly where they made a mistake and what the expected answer was
 - 2.3 The system will not penalize users for spelling mistakes on their answers
 - 2.4 Buttons should not be smaller than 10mm x 10mm in size to prevent miss clicks
- 3 The system shall be perceivable and operable by users with diverse sensory and motor capabilities - [5] [6]
 - 3.1 The system shall follow the [dyslexia style guide \(2023\)](#) published by the British dyslexia association
 - 3.2 The system shall not have items that blink faster than twice a second to avoid seizure risk on susceptible users
- 4 The difficulty of the courses shall challenge but not overwhelm the users - [1] [6]
 - 4.1 Lessons will display a time estimate for how long it will take to solve them
 - 4.2 Regular lessons shall not take longer than 3 minutes to complete on average
 - 4.3 Longer off-app tasks that serve as a means for the user to practice and improve their soft skills will not be a requirement to continue with the course's regular content and can be completed any time after unlocking them.
 - 4.4 The system will provide access to hints for lessons that are expected to be more difficult than usual (As determined by the people in charge of building the courses)

5 The system shall provide tools for users to assess their proficiency in the soft skills they are studying - [1]

5.1 The system will offer a progress dashboard that displays course progress and performance trends

5.2 The system will offer periodic assessments that measure users' soft skill levels and compare them with previous scores to showcase improvement.

6 The system shall incorporate gamification elements to motivate progress and completion of courses - [1]

6.1 The system shall assign visible points to the user for each completed lesson

6.2 The system will give badges to the user to represent specific milestones for each course
