

Requirements Specification Document

RF

RF	Description
RF01	The system displays the list of available soft skill courses.
RF02	The system offers lessons to improve soft skills for each available course.
RF03	The system periodically evaluates the user's progress
RF04	The system tracks and stores the user's progress.
RF05	The system allows the user to login and logout from his account

RNF HCI:

RNF	Description
RNF01	The system will use a consistent style for intractable areas such as text boxes and buttons for a more cohesive experience
RNF02	The system must offer a minimalist interface, without unnecessary elements that distract or overwhelm the user during the learning process
RNF03	The system will have a clear indication of progress for each course the user is enrolled in
RNF04	If the result of an action the user performs cannot be shown instantly the system will display a clear indication that their input is being processed
RNF05	The system will offer tasks that allow the user to apply their soft skills on real world scenarios
RNF06	The system will provide tooltips and contextual help to assist users in understanding features and functionalities without requiring extensive documentation
RNF07	The system will ensure that all interactive elements have sufficient size and spacing to prevent accidental inputs
