

Non-Functional Requirements

NFR-001

Description: Interaction must ensure the successful completion of key tasks

Metric: Completion rate of key tasks without leaving the flow (e.g. completing review lesson).

Acceptance Criteria: At least 90% of the tasks simulated in the prototype can be completed without blocking or ambiguity.

Basis of the metric: <https://www.nngroup.com/articles/usability-metrics/>

NFR-002

Description: Feedback must be clear and immediate

Metric: Percentage of users who correctly identify whether their answer was correct or incorrect on the first attempt.

Acceptance Criteria: At least 90% of users understand the result of their response without further explanation.

Basis of the metric: <https://www.nngroup.com/articles/visibility-system-status/>

NFR-003

Description: The system should allow progress to be shared with minimal effort.

Metric: Navigation error rate (clicks on incorrect elements or failed attempts to find functions)

Acceptance Criteria: In prototype testing, the navigation error rate should be less than 10% in the main flows.

Basis of the metric: <https://www.nngroup.com/articles/usability-metrics/>

NFR-004

Description: Team building for collaborative challenges should be fluid

Metric: Task Success Rate

Acceptance Criteria: 90% or more of users complete key tasks without assistance.

Basis of the metric:

NFR-005

Description: The system must minimize navigation errors

Metric: Navigation error rate (clicks on incorrect elements or failed attempts to find functions)

Acceptance Criteria: In prototype testing, the navigation error rate should be less than 10% in the main flows.

Basis of the metric: <https://www.nngroup.com/articles/usability-metrics/>
