

Test Flows

1. Start the Next Lesson

Description: The user enters the critical thinking course and navigates to the next available lesson.

Test Flows:

1. From the catalog screen, the user accesses the *Pensamiento crítico* course by pressing “Go to course.”
2. On the activity screen, the user clicks on the highlighted “Next” activity.
3. The system immediately loads the new lesson.

Supported NFRs:

- **NFR-001:** Ensures continuous flow in key tasks.
- **NFR-002:** The system must provide immediate feedback.
- **NFR-005:** Minimizes navigation errors.

2. Add Friends from Notes

Description: The user answers a question, navigates to the lesson notes section, and adds Russel Bonilla as a friend.

Test Flows:

1. On the current activity screen, the user answers the question and validates.
2. The user goes to the notes section below the explanation and adds Russel Bonilla as a friend.

Supported NFRs:

- **NFR-003:** Facilitates sharing progress with minimal effort.
- **NFR-005:** Minimizes navigation errors.

3. Share on LinkedIn

Description: The user shares an achievement on their professional network.

Test Flows:

1. On the current lesson screen, the user answers and validates the challenge question.
2. On the completion screen, the user clicks the “Share” icon.
3. A post preview appears and the user presses the LinkedIn icon.

Supported NFRs:

- **NFR-003:** Promotes easy and frictionless sharing.

4. Copy Your Friend Code

Description: The user copies their friend code to invite others.

Test Flows:

1. From the catalog screen, the user accesses their profile.
2. The user presses the copy icon next to their friend code.
3. The system changes the copy icon to a checkmark and displays a “Code copied” message.

Supported NFRs:

- **NFR-003:** Simplifies sharing the code.
- **NFR-002:** Provides immediate feedback after copying.

5. Change Progress Visibility

Description: The user changes who can see their progress.

Test Flows:

1. On the course activity screen, the user clicks the “Friends” button in the bottom navigation bar.
2. On the social screen, the user presses the three-dot menu and selects “Progress visibility.”
3. On the privacy settings screen, the user selects “Show only to.”
4. On the “Show only to” screen, the user selects *Daniela Jimenez* and confirms.

Supported NFRs:

- **NFR-002:** Provides clear feedback.

- **NFR-005:** Minimizes navigation errors.
